A wealth of 1st Party Data: Targeting & reporting without 3rd party cookies

Since its inauguration, the Nikkei Online Edition been building the Nikkei ID membership system, receiving 1st Party Data and implementing attribute-based targeting. This system has been trusted and used by many advertisers.

In addition to this, we have accumulated approximately 40 million UBs of visitation and browsing data per month in our proprietary data warehouse, Atlas. Additionally, targeting by browsing behavior using this 1st Party Data was introduced in 2021.

Apple's privacy regulation (ITP) and Google's 3rd party cookie regulation scheduled for the latter half of 2024 have become urgent issues. However, the Nikkei Online Edition will continue to provide various targeting services based on the rich and robust 1st Party Data.

The strength of 1st Party Data is also demonstrated in delivery analysis reports. We hope you will make use of it.
The Nikkei Online Edition offers a variety of targeting methods. You can choose the one that best suits your purpose.

Guidelines/Disclaimers

- First-time advertisers are subject to screening by NIKKEI. As provision of certain necessary documentation is required, please contact us via the applicable email address at the “Ad Placement Inquiry & Order Contacts” section at the following page.

- The minimum insertion period of all products is 5 days.

- Regarding products with guaranteed impressions, please note this guarantee does not include guarantee of equalized distribution per date and time over the course of the advertisement’s insertion period itself.

- In the event there is an issue with advertisement serving and/or display, support will be provided only during business hours the FOLLOWING day, not the day of. NIKKEI is NOT legally responsible for ANY financial loss or harm suffered by the client during this period.

- Unless noted otherwise, the standard data categories provided at NIKKEI’s ad serve performance reports are # of impressions, # clicks and CTR only. We do not provide screenshots.

- Please note there are cases where NIKKEI may carry out surveys regarding creatives served to aid in improvement of NIKKEI service(s) and customer satisfaction.

- Depending upon individual user browser and/or device environment settings, there is a possibility ads may not be displayed, or displayed incorrectly, or that links may not direct to the designated location despite being clicked.

- iOS app of NIKKEI Online edition will show linked site using the in-app browser. If there is screen transition using new tabs and windows in linked site, screen transition may not work as intended.

- Advertisements are subject to delay or cancellation due to events beyond NIKKEI’s control, e.g. natural disasters, power grid and/or communications systems failure, etc.

- Please note advertisements’ display location subject to adjustment per news content and in accordance with website layout revisions aimed at improvements in usability.

- Depending on the size of new designed site, ad for mobile may be shown to PC and ad for PC may be shown to mobile device.

3rd Party Ad Serving and Tracking

- In the case of 3rd party delivery, please inform us of the platform to be used beforehand. We will confirm compatibility. Also, please note that the impression count will be determined by NIKKEI’s ad server, NOT the client’s.

- Each rich media advertisement should be tested beforehand. It will take approximately two weeks to test a new service. Please make sure to inquire in advance. Google Marketing Platform Campaign Manager, Sizmek

- If you wish to have tracking tags installed, please inform us of services you use, advertising products you wish to measure, and the purpose of measurement”. Nikkei will review and get back to you with its availability. If you want to track by using multiple solutions, please submit a single file that combines those tags.

- Provision of an opt-out clause at both the NIKKEI and the advertiser’s website is required when carrying out retargeting of users who viewed and/or clicked ads placed at the Nikkei Online Edition.

- In the case creative optimization is carried out, please note a creative replacement/swap fee will be incurred per each additional creative pattern. In addition, as we are unable to pre-screen creatives consisting of product images fed directly from an advertiser’s website, this type of ad is not accepted.

- When a creative is being produced per the intake processing of external files, please note insertion of any such creatives are subject to postponement until it can be confirmed it is possible to display without affecting the layout of the Nikkei Online Edition.

- Please do not just send 3rd party tags for creative review use. The creative(s) itself/themselves and their parts must be submitted to enable NIKKEI’s confirmation of all ad contents.

- It is not possible to adjust the creative’s element tags or scripts after it has been submitted to NIKKEI. Instead, please submit a new creative reflecting the desired changes. NIKKEI will swap the new creative in the place of the old one after confirming the new creative functions properly.

- Tags must be provided in SSL (https) format, eg. ‘https://xxxx.com/xxxx’ OR ‘//xxxx.com.xxxx’

- In the case z-index is designated at CSS, it must be under 10000.

- For 3rd party ad serve campaigns, please note NIKKEI will request the provision of ad serve reports generated from 3rd party ad serve platform(s) for use in performance analysis.
Guidelines/Disclaimers

On Advertisement Health

- We block malicious traffic, including from traffic bots, by utilizing a blacklist. We release data regarding integrity of advertisement such as its viewability. Please see the NIKKEI Marketing Portal for more information.

- Please let us know in advance if you will use an ad verification tool. As brand safety functions sometimes hinder showing your advertisement, we may ask you to prepare an alternative creative.

Regarding Click Count Tracked URLs

- Designate URLs for click count tracking by either surrounding them with half width character blanks (tracking “on”) or full width character blanks (tracking “off”).

| URL TO HAVE | click count tracked: | □http://www.nikkei.co.jp/xxxx/yyyy □ |
| URL NOT TO HAVE | click count tracked: | □http://www.nikkei.co.jp/xxxx/yyyy □ |

- URLs designated for click count tracking will be converted at distribution.
- URL Provided at Copy Submission: [http://www.nikkei.co.jp/form/campaign/10Q2_ST6.html](http://www.nikkei.co.jp/form/campaign/10Q2_ST6.html)

- In the case a URL is designated for click count tracking, please be mindful of the # of characters the post-conversion URL will possess: post conversion URLs will consist of 22 to 25 full width characters. Right-side text alignment and centering are not possible.
- Post conversion URLs will start at the same character location of the original URL.
- Manual attempts at text centering and right-side text alignment cannot be guaranteed to display as desired, and as such doing so is not recommend.

Even if the original creative looked perfect, when distributed ↓ the formatting may be shifted. For example per below:

- Do not include any additional text on the same line as a URL designated for tracking, as per the conversion process said text will be lost. Example:

```
| □http://www.nikkei.co.jp/xxxx/yyyy □ |
| □http://www.nikkei.co.jp/xxxx/yyyy □ |
```

Layout Irregularities and Character Disfiguration

- Please note that layout irregularities that may occur due to users’ O.S., email client or individual user environmental settings are outside the scope of and not covered by NIKKEI’S product viewability guarantee.
- Nikkei ID Targeted Emails are designed for composition and display per monospace fonts. For mail recipients using proportional fonts, in some cases, manually aligned and centered text may not appear as such.
