Trusted media
For trusted brands
All for the readers

As the waves of digital transformation surge at an unforeseen pace, we are seeing the world change rapidly. It's also true that unprincipled use of technology could impair the reader experiences, corporate brand value, and trust in the media. Therefore, a discerning eye for the reliable is needed more than ever.

We aim to enhance our clients' brand value by conveying their passion for business. For our clients to win trust in this age of online dissonance, we believe that the vehicles of the message must also be reliable.

**Trusted media
For trusted brands
All for the readers**

We never use technology to compromise our values.
We incorporate our values in every step of the process.

We pride ourselves on providing brand-safe, high-quality ad space that is free of brand-damaging context.

Various 1st Party Data Targeting & reporting without 3rd party cookies

NIKKEI

Since its inauguration, the Nikkei Online Edition has been building the Nikkei ID membership system, or 1st party data, and implementing attribute-based targeting. This system has been trusted and used by many advertisers.

In addition to this, we have accumulated approximately 50 million UBs of visitation and browsing data per month in our proprietary data warehouse, Atlas. Targeting by browsing behavior using this 1st Party Data has also been released in 2021.

Apple's privacy regulation (ITP) and Google's 3rd party cookie regulation scheduled for the latter half of 2024 have become urgent issues. However, the Nikkei Online Edition will continue to provide various targeting services based on the rich and robust 1st Party Data.

The strength of 1st Party Data is also demonstrated in delivery analysis reports. We hope you will make use of it.

NIKKEI

- When targeting by **two or more** Nikkei ID demographic attributes, the rate will be the same as segment 1(*).
- When targeting multiple attributes from segment 3, the rate is calculated using the number of attributes multiplied by the segment charge (x 120% x 120% x 120%...)
- When custom segments are combined with Nikkei ID attributes, a 150% premium fee will be applied to each segment fee.
(Example: Reading Tendency Segment x High Income Group = 150% x 200% = 300%)
- When utilizing multiple targeting options, please contact NIKKEI prior to order placement to check availability during desired insertion period.
- Minimum order for each segment (including multiple attributes) is 500,000 JPY. Orders exceeding minimum only due to selection of multiple attributes will not be accepted.
